PROFESSIONAL EXPERIENCE

BLIP (THROUGH AUBAY)

Front End Developer

PORTUGAL

Nov 2023- Actual

Blip is a software company that develops solutions for the Flutter group, with a focus on the Betfair platform.

- Led the adaptation of Betfair's platform to comply with Brazilian betting regulations under strict deadlines, ensuring legal compliance.
- Developed and maintained scalable, high-performance code in a React-based monolithic application.
- Collaborated closely with stakeholders, translating technical concepts into clear business insights and aligning development efforts with product needs.
- Consistently delivered high-quality code with automated testing frameworks (Jest, Storybook), ensuring robust and maintainable software.
- Recognized for clear communication and leadership, receiving positive feedback from both product teams and developers.

KANTAR (THROUGH ALTER SOLUTIONS)

Front End Developer

PORTUGAL

Jan 2023- Oct 2023

Kantar XTEL focuses on system development and modernization, where I contributed to the migration and enhancement of legacy systems.

- Key contributor in migrating legacy systems from SenchaJS to React, modernizing the platform and improving maintainability.
- Ensured code quality by implementing comprehensive testing strategies using Jest, Storybook and Playwright, resulting in more stable releases.
- Developed and maintained detailed front-end documentation in Storybook, improving team collaboration and onboarding processes.
- Collaborated with cross-functional teams using the Azure ecosystem to plan, execute, and deliver tasks efficiently.

DOARE (THROUGH SOFTO)

Full Stack Developer

BRAZIL

Sept 2021- Jan 2023

Doare is a platform focused on charitable giving and social impact, where I played a key role in transitioning from outdated infrastructure to a modern, scalable system.

- Led the transition of Doare's platform, improving database performance by 400%, significantly enhancing system speed and efficiency.
- Implemented best practices and workflows, including the introduction of automated Discord notifications for codebase updates, improving team communication and efficiency.
- Developed an internal documentation portal to streamline onboarding for new team members and maintain up-to-date code documentation.
- Utilized Postman to document and standardize API processes, improving clarity and collaboration across teams.
- Designed and implemented a new Front-end architecture using React, improving maintainability and scalability of the platform.
-

SUPER DESENVOLVEDORES

Full Stack Developer & Co-Founder

BRAZIL

Jan 2020- July 2023

Super Desenvolvedores is a tech education and e-commerce platform, where I co-founded and contributed to various projects in development, education, and financial solutions.

- Co-founded the company, driving technology education initiatives and developing solutions for financial management and e-commerce.
- Played a key role in developing and maintaining various projects using Ruby on Rails, React, Redux, NextJS, and Node.js.
- Led the transition to a microservices architecture, enhancing scalability and maintainability of the platform.
- Utilized Docker for containerization, ensuring consistent development and deployment environments.

OLX
Apprentice & Intern

BRAZIL
April 2018- Jan 2020

OLX is a leading online marketplace, where I contributed to multiple projects focusing on automation and user experience improvements.

- Developed automated spreadsheets to enhance the audit team's workflow and improve data analysis efficiency.
- Customized the Help Center to improve user experience and accessibility.
- Built animated panels using React to showcase monthly rankings, enhancing UI interactivity.

EDUCATION

FIAP – Brazil

Bachelor's Degree in Information Technology, Graduated in Jan 2021
Focused on software development, system design, and IT solutions.

LANGUAGES

Portuguese – Native
English – Advanced (C1)

SKILLS

Languages & Frameworks: Node.js, Typescript, ReactJS, Next.js, NestJS, AdonisJS

Testing & Tools: Jest, Cypress, Storybook, Postman, Docker

Version Control: Git

Architecture: Microservices, Monolithic Systems
