SUMMARY

Software Engineer with over 6 years of experience in developing modern web applications, specializing in Frontend. Expertise in React, TypeScript, and building scalable, high-performance user interfaces focused on user experience. In addition to strong frontend skills, also has practical experience in Backend development using Node.js and NestJS, contributing to robust API design and seamless integrations. Has worked at large-scale companies like OLX, Blip.pt (Betfair), Kantar XTEL and Hapimag collaborating with cross-functional teams on high-impact projects. Familiar with DevOps practices, including Docker and CI/CD pipelines, supporting a more integrated development workflow. Committed to technical excellence, clean code, and sustainable solutions aligned with best practices in software engineering.

SKILLS

Proficient: HTML, CSS, Javascript, Typescript, React, NodeJS, AdonisJS, NextJS, Jest, Storybook, E2E Tests, Visual Tests, Tailwind, MaterialUI, React Query, Git

Intermediate: Redux, Zustand, GraphQL, NestJS, PostgreSQL, MongoDB, React Native, Docker, Playwright, Cypress, Apollo Client, Vite, Webpack

Beginner: Ruby on Rails, Python, FastAPI

PROFESSIONAL EXPERIENCE

Software Engineer

Hapimag, Switzerland, Remote

12/2023 to 09/2025

Core Responsibilities:

- Develop and maintain frontend features for a staff management platform using React and TypeScript, focusing on user experience and performance optimization.
- Build and maintain scalable, reusable UI components following design system principles and best practices.
- Contribute to backend development using Python and FastAPI, building robust APIs and supporting seamless integration between frontend and backend systems.

Key Technologies and Tools: HTML, CSS, Javascript, Typescript, React, Tailwind, NodeJS, Python, FastAPI

Software Engineer

Blip.pt, Portugal, Remote

12/2023 to 09/2025

Core Responsibilities:

- Delivered key frontend features for a major sports betting platform using React.
- Implemented automated tests (unit, E2E, visual and regression) reducing production bugs.
- Maintained and scaled a shared design system with Storybook, increasing component reusability across teams and reducing UI development time.
- Collaborated with cross-functional teams (PMs, designers, backend engineers) to shape product decisions, directly influencing technical priorities and cost-efficiency.
- Contributed to discussions on architecture and tooling trade-offs, helping optimize platform investments and long-term maintainability.

Key Technologies and Tools: HTML, CSS, Javascript, Typescript, React, NodeJS, Jest, Storybook, E2E Tests, WebdriverIO, Visual Tests, GraphQL, React Native, Docker

Software Engineer

Kantar XTEL, UK, Remote

12/2022 to 11/2023

Core Responsibilities:

- Implemented end-to-end testing with Playwright within storybook, improving test coverage and catching bugs inside components before production.
- Partnered with product and design teams to deliver user-centric features with strong emphasis on accessibility (WCAG) and performance using Radix UI.
- Participated in sprint planning and technical refinement, aligning technical decisions with business goals and delivery timelines.

Key Technologies and Tools: HTML, CSS, Typescript, React, Storybook, Playwright, SenchaJS,

Full Stack Developer

Doare, Rio de Janeiro, BR – Remote

10/2021 to 12/2022

Core Responsibilities:

- Led the migration of legacy microservices from PHP to a clean, high-performance monolithic API using NestJS, resulting in significant architectural simplification.
- Refactored and rebuilt the entire database layer, migrating from poorly structured MySQL to a normalized PostgreSQL schema, boosting some data query performances by over 400%.
- Designed and implemented a complex data-mapping strategy to migrate legacy records into the new schema, preserving integrity while transforming the entire data model.
- Solely responsible for the full migration of the internal client management frontend from Angular to React, modernizing the UI/UX and reducing code complexity.
- Built and deployed a new micro frontend using Next.js to support modular and scalable SSR frontend delivery.

Key Technologies and Tools: React, Next.js, Angular, NestJS, Node.js, TypeScript, JavaScript, PostgreSQL, MySQL, MongoDB, Docker, AWS

Co-Founder & Full Stack Developer

Super Desenvolvedores, Rio de Janeiro, BR – Remote

04/2020 to 07/2023

Core Responsibilities:

- Designed and developed responsive user interfaces for websites and web applications using React and modern JavaScript.
- Delivered frontend solutions for small businesses and personal projects, applying best practices in UI development and performance optimization.
- Collaborated with a co-founder responsible for backend development to integrate APIs and ensure smooth end-to-end functionality.
- Contributed to project scoping, client communication and code maintenance across multiple short-term engagements.

Key Technologies and Tools: React, JavaScript, TypeScript, AdonisJS, Ruby on Rails, Cypress, Redux.

Intern

OLX, Rio de Janeiro, BR – On-site

04/2018 to 04/2020

Core Responsibilities:

- Developed automated spreadsheets to enhance the audit team's workflow and improve data analysis efficiency.
- Customized the Help Center to improve user experience and accessibility.
- Built animated panels using React to showcase monthly rankings, enhancing UI interactivity.

Key Technologies and Tools: JavaScript, Typescript, React, Tailwind, NodeJS, HTML, CSS

EDUCATION

Bachelor of Computer Science

FIAP, Sao Paulo, Brazil

02/2019 to 12/2021

ESL Communication Skills Program Intermediate and Advanced Levels

Rice University, Texas, United States

06/2022 to 09/2022

CERTIFICATES/COURSES

Go Stack, Rocketseat, Brazil

01/2019

LANGUAGES

Portuguese: Native

English: Advanced
